Abstracts

A tunable laser is a laser the emission wavelength of which can be tuned (i.e. adjusted). It can be used for device characterization, e.g. of photonic integrated circuits. In optical fiber communications with wavelength division multiplexing, a tunable laser can serve as a spare in the case that one of the fixed-wavelength lasers for the particular channels fails. The global tunable laser market was estimated at USD 1,227 million in 2021 and is expected to hit USD 1,983 million by 2028, registering a CAGR of 7.1% from 2022 to 2028 as per the latest report by Gen Consulting Company.

The report provides in-depth analysis and insights regarding the current global market scenario, latest trends and drivers into global tunable laser market. It offers an exclusive insight into various details such as market size, key trends, competitive landscape, growth rate and market segments. This study also provides an analysis of the impact of the COVID-19 crisis on the tunable laser industry.

This industry report offers market estimates and forecasts of the global market, followed by a detailed analysis of the type, technology, wavelength, end user, and region. The global market for tunable laser can be segmented by type: free-electron laser (FEL), gas tunable laser, solid state lasers, others. According to the research, the solid state lasers segment had the largest share in the global tunable laser market. Tunable laser market is further segmented by technology: cavity diode laser, distributed bragg reflector (DBR), micro electro mechanical system (MEMS), vertical cavity surface emitting lasers (VCSELs). In 2021, the cavity diode laser segment made up the largest share of revenue generated by the tunable laser market. Based on wavelength, the tunable laser market is segmented into: less than 1000nm, 1000-1500nm, above 1500nm. On the basis of end user, the tunable laser market also can be divided into: aerospace, manufacturing, medical and biotechnology, semiconductor, telecommunications, others. Tunable laser market by region is categorized into: North America, Asia Pacific, Europe, Rest of the World (ROW).
