Abstracts

A turnstile, also called a baffle gate or turnstyle, is a form of gate which allows one person to pass at a time. It can also be made so as to enforce one-way traffic of people, and in addition, it can restrict passage only to people who insert a coin, a ticket, a pass, or similar. Thus a turnstile can be used in the case of paid access (sometimes called a faregate or ticket barrier when used for this purpose), for example to access public transport, a pay toilet, or to restrict access to authorized people, for example in the lobby of an office building.

The report covers forecast and analysis for the turnstile market on a global and regional level. The study provides historic data of 2012-2016 along with a forecast from 2017 to 2022 based on both volumes and revenue. The study includes drivers and restraints for the turnstile market along with the impact they have on the demand over the forecast period. Additionally, the report includes the study of opportunities available in the turnstile market on a global level.

The report has been prepared based on the synthesis, analysis, and interpretation of information about the global turnstile market collected from specialized sources. The competitive landscape section of the report provides a clear insight into the market share analysis of key industry players.
