## Abstracts

UV stabilizers are substances that are used to prevent a chemical process referred to as 'photo degradation' which occurs when ultraviolet radiation coming from an artificial light source or the sun collapses chemical bonds within a polymer. The global UV stabilizers market was valued at USD 1,105 million in 2021 to USD 1,576 million by 2028, progressing at a CAGR of 5.2% from 2022 to 2028, according to Gen Consulting Company.

The report provides in-depth analysis and insights regarding the current global market scenario, latest trends and drivers into global UV stabilizers market. It offers an exclusive insight into various details such as market size, key trends, competitive landscape, growth rate and market segments. This study also provides an analysis of the impact of the COVID-19 crisis on the UV stabilizers industry.

This industry report offers market estimates and forecasts of the global market, followed by a detailed analysis of the product, application, and region. The global market for UV stabilizers can be segmented by product: hindered amine light stabilizers (HALS), uv absorbers, quenchers. Globally, the hindered amine light stabilizers segment made up the largest share of the UV stabilizers market. UV stabilizers market is further segmented by application: flooring and decking, furniture coating, automotive coating, packaging, others. The flooring and decking segment captured the largest share of the market in 2021. Based on region, the UV stabilizers market is segmented into: Asia Pacific, Europe, North America, Rest of the World (RoW). According to the research, Asia Pacific had the largest share in the global UV stabilizers market.

By product:

hindered amine light stabilizers (HALS)

uv absorbers

quenchers

By application:

flooring and decking

furniture coating

automotive coating

packaging

others

By region:

Asia Pacific

Europe

North America

Rest of the World (RoW)

The global UV stabilizers market report offers detailed information on several market vendors, including BASF SE, BYK-Chemie GmbH, Chitec Technology Co., Ltd., Clariant AG, Everlight Chemical Industrial Corporation, Evonik Industries AG, Lanxess AG, SI Group, Inc., Solvay S.A., Songwon Industrial Co., Ltd., Valtris Specialty Chemicals, Inc., among others.

Historical & Forecast Period

This research report provides analysis for each segment from 2018 to 2028 considering 2021 to be the base year.

### Scope of the Report

To analyze and forecast the market size of the global UV stabilizers market.

To classify and forecast the global UV stabilizers market based on product, application, region.

To identify drivers and challenges for the global UV stabilizers market.

To examine competitive developments such as mergers & acquisitions, agreements, collaborations and partnerships, etc., in the global UV stabilizers market.

To identify and analyze the profile of leading players operating in the global UV stabilizers market.

### Why Choose This Report

Gain a reliable outlook of the global UV stabilizers market forecasts from 2022 to 2028 across scenarios.

Identify growth segments for investment.

Stay ahead of competitors through company profiles and market data.

The market estimate for ease of analysis across scenarios in Excel format.

Strategy consulting and research support for three months.

Print authentication provided for the single-user license.
