Abstracts

Wet shaving has several benefits over dry shaving, including a closer and smoother shave, less irritation and razor burn, and improved skin health. Wet shaving also helps to exfoliate the skin, removing dead skin cells and leaving the skin feeling soft and smooth. In addition to the benefits for the skin, wet shaving can also be a more enjoyable and relaxing experience compared to dry shaving. The use of a shaving brush and high-quality shaving products can create a luxurious experience that can feel like a treat or self-care ritual. According to the latest data, the market size of the global wet shaving products sector is expected to rise by USD 12.3 billion with a CAGR of 9.47% by the end of 2029.

The report covers market size and growth, segmentation, regional breakdowns, competitive landscape, trends and strategies for global wet shaving products market. It presents a quantitative analysis of the market to enable stakeholders to capitalize on the prevailing market opportunities. The report also identifies top segments for opportunities and strategies based on market trends and leading competitors' approaches.

This industry report offers market estimates and forecasts of the global market, followed by a detailed analysis of the product, gender, distribution channel, and region. The global market for wet shaving products can be segmented by product: disposable razors, non-disposable razors, shaving lotions & creams, razor cartridges, blades, others. The shaving lotions & creams segment captured the largest share of the market in 2022. Wet shaving products market is further segmented by gender: male, female. The male segment held the largest share of the global wet shaving products market in 2022 and is anticipated to hold its share during the forecast period. Based on distribution channel, the wet shaving products market is segmented into: supermarkets and hypermarkets, independent retailers, others.
