Abstracts

White wine is produced through the fermentation of the pulp of grapes and as grapes are naturally chemically balanced to ferment without requiring additional sugars, acids, enzymes or other nutrients. White wine contains nutrients that absorb toxins in the blood and could therefore reduce inflammation in the airways, protecting the lungs. The global white wine market is likely to register a CAGR of over 2.5% with an incremental growth of USD 19.6 billion during the forecast period 2023-2029.

The report covers market size and growth, segmentation, regional breakdowns, competitive landscape, trends and strategies for global white wine market. It presents a quantitative analysis of the market to enable stakeholders to capitalize on the prevailing market opportunities. The report also identifies top segments for opportunities and strategies based on market trends and leading competitors' approaches.

This industry report offers market estimates and forecasts of the global market, followed by a detailed analysis of the product, distribution channel, and region. The global market for white wine can be segmented by product: dry white wine, sweet white wine.
