Abstracts

Dry eye disease is a common eye condition that occurs when the eyes do not produce enough tears or the tears evaporate too quickly. It can cause discomfort, irritation, and even vision problems. The severity of dry eye disease can range from mild to moderate to severe, depending on the extent of the symptoms and the impact on daily life. Moderate dry eye disease is characterized by more significant symptoms, such as persistent dryness, burning, and stinging sensations in the eyes, as well as blurred vision and sensitivity to light. Moderate dry eye disease can be caused by a variety of factors, including aging, hormonal changes, medication side effects, and environmental factors. Severe dry eye disease is a more advanced form of the condition, characterized by more severe and chronic symptoms that can significantly impact daily life. The moderate and severe dry eye disease market in China is anticipated to increase by USD 596.3 million till 2029 at an average annual growth of 27.13 percent as per the latest market estimates.

This industry report offers market estimates of the China market, followed by a detailed analysis of the region. The China market data on moderate and severe dry eye disease can be segmented by region: Central South China, East China, North China, Northeast China, Northwest China, Southwest China.
