Abstracts

Online pharmacies offer a convenient way for individuals to purchase medications without having to visit a physical pharmacy or doctor's office. They can be based in the same country as the customer or in another country, and they may or may not require a prescription to purchase medications. There are several potential benefits to using online pharmacies. They can provide access to medications for individuals who live in remote or underserved areas, or who have difficulty leaving their homes due to illness or disability. Online pharmacies may also offer lower prices than traditional brick-and-mortar pharmacies, as they have lower overhead costs. In addition, online pharmacies can provide a level of privacy and anonymity that may be appealing to some customers. According to the latest data, the market size of the online pharmacies industry in China is expected to rise by USD 141.6 billion with a CAGR of 29.86% by the end of 2029.

This industry report offers market estimates of the China market, followed by a detailed analysis of the type. The China market data on online pharmacies can be segmented by type: medical devices, nutrition products, OTC (over-the-counter), prescription.

The report also includes the profiles of leading companies such as Alibaba Health Information Technology Limited, JD Health International Inc., Shanghai Pharma Health Commerce Co. Ltd.
