## Abstracts

Trimellitic anhydride (TMA) is a white crystalline flake material with a primary use in the synthesis of trimellitate esters which are plasticisers used to modify the properties primarily of PVC and other plastics. TMA is also used as a resin component for resins including powder coating resin and in some curing agent formulations for Epoxy resins. It is also used as an intermediate for the synthesis of surface coatings chemicals, adhesives, polymers, dyes, printing inks, pharmaceuticals and agrochemicals. It has a key use as a component in the production of heat proof varnishes and paints as well as wire enamels and can coating resins. According to latest analysis by Gen Consulting Company, the trimellitic anhydride market in China is estimated to increase at the rate of 5.7% each year in the period from 2022 to 2028.

This industry report offers market estimates of the China market, followed by a detailed analysis of the application. The China market data on trimellitic anhydride can be segmented by application: plasticizers, powder coatings, others.

Some of the leading companies operating in the market are Anhui Taida New Materials Co. Ltd., Jiangsu Baichuan High-tech New Materials Co. Ltd., Jiangsu Zhengdan Chemical Industry Co. Ltd., Polynt Chemical (Changzhou) Co. Ltd.

The data-centric report focuses on market trends, status and outlook for segments. With comprehensive coverage of the market across different market segments, the report is a valuable asset for the existing players, new entrants and the future investors.
