Please note that this publication is updated monthly

Imagine having your own team of pharmaceutical patent experts at the click of a button.

Used by the world's leading pharmaceutical companies and legal teams for over 10 years, Ark In-depth Searches are the benchmark in comprehensive, accurate and relevant patent data. Searched and analysed by highly trained, qualified staff using proprietary searching techniques, you won't need to worry about missing patents or updating data. And that means your IP staff will be freed up to concentrate on your business, rather than getting bogged down in patent data.

"Provides structured, pre-analysed comprehensive patent data." Head of IP Department - AET

"gives me a one-step full knowledge of all patents covering the product of interest. Ark Patent Intelligence is easy to use as you get to the information needed with one click." Managing Director - PharOS

"Ark Patent Intelligence provide a service unparalleled elsewhere in the industry."
Head of Product Development" - Niche Generics Ltd

Eliminate bottlenecks and free up months of expert manpower

- Over 420 fully researched and updated patent searches by highly trained, qualified staff using proprietary searching techniques, available for instant online access
- Intuitive, easy to understand design provides vital documents at your fingertips
- Collaborate and share company knowledge with online access to notes and flags

Quickly grasp complexity

- Identifies patents covering molecule, formulation, process, use, combinations and more
- Grouped by patent family and assigned to development categories based on interpretation of key aspects of the patent claims
- Manual filtration of patents so you only see what is relevant to you
- Covers the world's major territories with equivalents in over 80 countries

Never miss a change in the patent landscape

- Monthly updates to patent families, statuses, and litigation clearly identified
- Comprehensive litigation alerts linked to patent numbers
- Add your own notes, save searches and results
