## Abstracts

Chip resistors are mainly used for improving the reliability and functionality of electrical components through the creation and maintenance of an optimal level of current.

The report analyzes and presents an overview of Chip-R market worldwide. The report also provides a review of growth drivers, and strategic industry activities of major companies worldwide. In addition, 58 companies operating in the Chip-R arena worldwide including American Technical Ceramics Corporation, Anaren Inc., Bourns Inc., CTS Corporation, Hong Kong Resistors Manufactory, International Manufacturing Services Inc., NIC Components Corporation, Panasonic Corporation, and Vishay Precision Group, Inc. and others are profiled.
