Abstracts

Ethernet Access Devices (EADs) utilize DMT technology for Ethernet in the First Mile (EFM) bonding over the end-user organization's network infrastructure. As most of the devices that are available in the market boast matching capabilities, excluding certain add-on features, the market is witnessing intense competition between vendors for offering EADs with advanced add-on features.

The report analyzes and presents an overview of EADs market worldwide. Supported with 2 market data tables, the report also provides global market estimates and projections for Ethernet Access Devices in US dollars for years 2012 through 2017, by type for Fiber Ethernet Access Devices, and Copper Ethernet Access Devices. The report also provides a review of market trends, growth drivers, and strategic industry activities of major companies worldwide. In addition, 43 companies operating in the EADs arena worldwide including Actelis Networks Inc., Brocade Communication Systems Inc., Cisco Systems Inc., FibroLAN Ltd., IMC Networks, Metrodata Ltd., OneAccess Networks SA, Overture Networks Inc., and others are profiled.
