Abstracts

Inkjet printing is a form of digital printing that involves ejection of ink directly on the substrate. The technology utilizes a jet device located on the printer head to eject the ink in response to an electronic signal. Inkjet inks feature considerably low surface tension and viscosity. The market for functional inkjet materials is expected to witness considerable growth in the near future. This is primarily due to the increase in use of inkjet inks within multiple applications such as smart packaging, security printing, and brand protection, which continue to grow owing to the increasing rate of cybercrime.

The report analyzes and presents an overview of Functional Inkjet Ink market worldwide. The report provides a review of major types of Functional Inkjet Inks, and key end-use markets for Functional Inkjet Inks. The report highlights on various strategic industry activities of major companies witnessed by the industry over the last few years. In addition, 36 companies operating in the Functional Inkjet Inks arena worldwide including E. I. DuPont de Nemours and Company, Nazdar Ink Technologies, Sun Chemical Corporation, Toyo Ink SC Holdings Co. Ltd., Xennia Technology Ltd., and others are profiled.
