Nanopatterning: Market Research Report

| | |
|--------|-----------------|
| Date: | January 5, 2016 |
| Pages: | 139 |
| Price: | US\$ 4,500.00 |
| ID: | NC66485E375EN |

This report analyzes the Global market for Nanopatterning in US\$ Thousand by the following Technology Types - Nanoimprint Lithography (Hot Embossing Lithography, UV Nanoimprint Lithography, Soft Lithography, & Others), Scanning Probe Lithography, and Others. The Global market is further analyzed by the following End-Use Applications: Semiconductor & Other Microelectronics, and Others. Annual estimates and forecasts are provided for the period 2015 through 2022. Also, a six-year historic analysis is provided for this market. Market data and analytics are derived from primary and secondary research. Company profiles are primarily based on public domain information including company URLs. The report profiles 35 companies including many key and niche players such as -

- AMO GmbH
- Canadian Photonics Fabrication Centre
- EV Group
- IMS Chips
- Micro Resist Technology GmbH

Table of Content

I. INTRODUCTION, METHODOLOGY & PRODUCT DEFINITIONS

Study Reliability and Reporting Limitations
Disclaimers
Data Interpretation & Reporting Level
Quantitative Techniques & Analytics
Product Definitions and Scope of Study
Nanoimprint Lithography
Hot Embossing
UV Nanoimprint Lithography
Soft Lithography
Others
Scanning Probe Nanolithography
Others

II. EXECUTIVE SUMMARY

1. INDUSTRY OVERVIEW

Nanotechnology – A Curtain Raiser
Nanoscience – Breaking Conventional Size Barriers
Nanotechnology Market Gathering Momentum
Nanopatterning – A Prelude
Market Outlook

2. MARKET TRENDS & GROWTH DRIVERS

Nanoimprint Lithography (NIL) – The Dominant Technology
NIL Enables Cost-Effective Production of Photonics
Expanding Applications Benefit Market Growth
NIL Find Applications in the Nanophotonics Sector
Soft UV-NIL – A Promising Technology
NIL with a Soft Stamp
Microcontact Printing – A Growing Market
3D NANOPATTERNING – AN EMERGING TECHNIQUE
Development of Industrial Processes for Patterning Materials on Nanoscale
Electronic Devices – A Major Market for Nanopatterning
Demand for Nanopatterned Surfaces in Biomedical Applications
Use of NanoGraft Technologies in Treatment of Coronary Artery Disease
Growing Demand for Nanopatterning in Biological Applications
Turing Nanopatterns in Insect Corneas to Shed Light on Formation of 3D Patterns in Living Organisms
Demand from Nano-optics Boosts Nanopatterning Market
Nanosensors – Opportunities in Store

3. NANOPATTERNING TECHNOLOGIES

A Peek into the World of Possibilities with Nanotechnology
Enabling Technologies – Need of the Hour
Introduction to Nanopatterning
Nanopatterning Technologies
Nanoimprint Lithography
Applications
Functionalities
Advantages of Nanoimprint Lithography
Elimination of Residual Coatings
Effects of Proximity
Unique 3D Patterning Ability
Challenges
Overlay Capability
Defect Management
Template Patterning
Wearing of Imprint Templates
NIL Processes – Types
Application Areas for NIL
Hot Embossing Lithography
Potential Industry Requirements for Hot Embossing Lithography
Ultraviolet Nanoimprint Lithography
Step-and-Repeat Nanoimprint Lithography
Step-and-Stamp Imprint Lithography
Step-and-Flash Imprint Lithography
Potential Industry Requirements for UV-NIL
Soft Lithography / Microcontact Printing
Types of Microcontact Printing (mCP)
High-Speed mCP
Submerged mCP
Edge-Transfer Lithography
Positive mCP
Microdisplacement mCP
Applications of Microcontact Printing
DNA Patterning
Cells Patterning

Protein Patterning
Micromachining
Others
Soft-UV NIL
Photolithography
Historical Background
Fundamentals of Photolithography Procedure
Combined Nanoimprint and Photolithography
Advantages
Limitations
Scanning Probe Nanolithography
Dip-Pen Nanolithography
Applications of Dip-Pen Nanolithography
Advantages and Disadvantages of Dip-Pen Nanolithography
Scanning Tunneling Microscopy
Atomic Force Microscope-based Lithography
Scanning Probe Contact Printing
Nanografting
First Method: Nanoshaving
Second Method: Nanopen Reader and Writer
Third Method: Vesicle Fusion
Fourth Method: Meniscus Force Nanografting
Fifth Method: Cathodic Electrografting
Local Anodic Oxidation
Constructive Nanolithography
Nanostencil Lithography
Drawbacks
Potential Applications
Other Nanopatterning Technologies
Self-Assembled Monolayers
Nanopatterning through Phase Separation of Polymers
Laser-based Particle Deposition
Sputtering
Roller Nanoimprint Lithography
Select End-Use Applications
Biological Applications
Microfluidics
Electronic Devices
Semiconductors
Optoelectronics
Integrated Circuits
Semiconductor Fabrication – Fusion of Nanoimprint Technology and Defect Management
Nano-optics
Nanosensors

4. TECHNOLOGY DEVELOPMENTS

Unconventional Lithography for 3D Hierarchical Nanostructures - Recent Developments
Processes of Functional Structures with Patterns
Unconventional Top-down Lithography
Unconventional Bottom-up Lithography
Block Copolymer Lithography
Unconventional Lithography and Top-down Approaches for 3D Hierarchical Nano- and Micro-Structures
Two-Step Photolithography
Sequential Thermal Nanoimprint Lithography (t-NIL)

Vacuum-Assisted CFL to Fabricate 3D Hierarchical Bridge Structures
 Applications Using 3D Hierarchical Structure
 Directional Wetting and Scattering on Hierarchical Patterns
 Dry Adhesive with Hierarchical Structures
 Free Standing Polymeric Membrane
 Integrating Assembly
 Self-Assembly of Spherical Colloids
 Fabrication 3D Porous Inverse Opal Structure
 Nano-imprint DSA of Block Copolymers
 Nanotransfer Printing through DSA of Block Copolymers
 Self-Assembly of BCPs with High-Resolution Patterning
 Integrating Assembly Applications
 Colloid-Based Photoluminescent Microtags
 Fabrication of Sub-10 nm Scale Graphene Nanoribbon Transistor
 Multiscale Porous Nanocolander Network with Tunable Transport Properties
 3D STRUCTURES' DIRECT PATTERNING THROUGH NANOIMPRINT LITHOGRAPHY
 New NIL Technique to Improve Ordering in Periodic Arrays from BCPs
 New Generation Metamaterials
 Innovative Magnetic Nanopatterns
 NIL Makes Solar Cells with Higher Conversion Efficiency
 Hair Coloring with Nanopatterning
 High-Speed Roll-to-Roll Technology for Imprinting
 Rolith Develops New Nanopatterning Technology
 ALD – An Enabling Technology in Advanced Nanopatterning
 Nanopatterned Surfaces for Highly Selective Adhesion, Separation and Sensing
 Resist-Free Direct Thermal NIL Process
 3D NANOPARTICLE PATTERNING VIA DIRECT INCIDENT BEAM LITHOGRAPHY – A TECHNOLOGY TO RECKON WITH
 Fabrication of Single Crystal Oxide Surface using Focused-Ion-Beam System – A Novel Approach in Nanopatterning
 Thermal Dip Pen Lithography for Depositing Nanoparticles
 Nanopatterning Using Phase Separation of Polymers
 Innovations in Surface Wrinkling

5. RESEARCH & DEVELOPMENT INITIATIVES

The Emerging Nanopatterning Methods (NAPA) Project
 NILCom
 International Technology Roadmap for Semiconductors

Table 1. THE ITRS Lithography Roadmap (includes corresponding Graph/Chart)

Sematech Nanoimprint Lithography Program

6. PRODUCT LAUNCHES / INNOVATIONS

EV Group Introduces EVG 7200 LA SmartNIL System for Display Panel Manufacturing
 Leti and EVG Unveil INSPIRE Lithography Program
 EVG Launches New Hercules Lithography System
 NIL Technology Introduces CNI v2. 0, Next Generation of Compact Nanoimprint Tool for UV and Thermal Imprint, and Imprint in Vacuum
 Obducat Unveils Sindre G2 Nano-Imprint Litho System
 EVG Launches EVG 570R2R Roll-to-Roll NIL Tool
 EVG Unveils EVG720 Automated UV-NIL System

EVG Launches EVG PHABLE Exposure System

7. RECENT INDUSTRY ACTIVITY

EV Group and JOANNEUM RESEARCH Collaborate for R&D Activities in Large-Area Nanoimprinting

EV Group Supplies EVG HERCULES Lithography Track System to WIKA Group for Manufacturing

Pressure Sensor Devices

Obducat Signs Agreement with a Display Manufacturer Regarding Evaluation of NIL Technology for Large Area

DNP to Establish New Nanoimprint-Based Ultra-Micro Machining Business

Canon to Develop Next Generation Lithography System

Toshiba Partners with SK hynix for NIL Systems

SUSS MicroTec Inks with Singh Center for Nanotechnology for NIL

Canon Takes Over Molecular Imprints

EVG Establishes NILPhotonics Competence Center

EV Group Launches New SmartNIL

8. FOCUS ON SELECT PLAYERS

AMO GmbH (Germany)

Canadian Photonics Fabrication Centre (Canada)

EV Group (Austria)

IMS Chips (Germany)

Micro Resist Technology GmbH (Germany)

Molecular Imprints, Inc. (US)

Nanonex Corp. (US)

NanoOpto Corp. (US)

Nano-Terra, Inc. (US)

NIL Technology ApS (Denmark)

NTT Advanced Technology Corporation (Japan)

Obducat AB (Sweden)

PROFACTOR GmbH (Austria)

SET Corporation SA (France)

Sigma-Aldrich Corp. (US)

SUSS MicroTec AG (Germany)

SVG Optronics Co., Ltd. (China)

Toppan Photomasks, Inc. (US)

Transfer Devices, Inc. (US)

Vistec Electron Beam GmbH (Germany)

9. GLOBAL MARKET PERSPECTIVE

Table 2. World Recent Past, Current & Future Analysis for Nanopatterning by Technology Type - Nanoimprint Lithography (Hot Embossing Lithography, UV Nanoimprint Lithography, Soft Lithography, and Others), Scanning Probe Lithography, and Other Technologies Markets Independently Analyzed with Annual Sales in US\$ Thousands for Years 2015 through 2022 (includes corresponding Graph/Chart)

Table 3. World Historic Review for Nanopatterning by Technology Type - Nanoimprint Lithography (Hot Embossing Lithography, UV Nanoimprint Lithography, Soft Lithography, and Others), Scanning Probe Lithography, and Other Technologies Markets Independently Analyzed with Annual Sales in US\$ Thousands for Years 2009 through 2014 (includes corresponding Graph/Chart)

Table 4. World 14-Year Perspective for Nanopatterning by Technology Type - Percentage Share Breakdown of Dollar Sales for Nanoimprint Lithography (Hot Embossing Lithography, UV Nanoimprint

Lithography, Soft Lithography, and Others), Scanning Probe Lithography, and Other Technologies Markets for Years 2009, 2016, and 2022 (includes corresponding Graph/Chart)

Table 5. World Recent Past, Current & Future Analysis for Nanopatterning by End-Use Application - Semiconductor & Other Microelectronics, and Other End-Use Application Markets Independently Analyzed with Annual Sales in US\$ Thousands for Years 2015 through 2022 (includes corresponding Graph/Chart)

Table 6. World Historic Review for Nanopatterning by End-Use Application - Semiconductor & Other Microelectronics, and Other End-Use Application Markets Independently Analyzed with Annual Sales in US\$ Thousands for Years 2009 through 2014 (includes corresponding Graph/Chart)

Table 7. World 14-Year Perspective for Nanopatterning by End-Use Application - Percentage Breakdown of Dollar Sales for Semiconductor & Other Microelectronics, and Other End-Use Application Markets for Years 2009, 2016, and 2022 (includes corresponding Graph/Chart)

III. COMPETITIVE LANDSCAPE

Total Companies Profiled: 35 (including Divisions/Subsidiaries - 37)

The United States (10)

Canada (1)

Japan (6)

Europe (17)

France (2)

Germany (7)

Spain (1)

Rest of Europe (7)

Asia-Pacific (Excluding Japan) (2)

Middle East (1)

I would like to order:

Product name: Nanopatterning: Market Research Report
Product link: <https://marketpublishers.com/r/NC66485E375EN.html>
Product ID: NC66485E375EN
Price: US\$ 4,500.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service: office@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click 'BUY NOW' button on product page <https://marketpublishers.com/r/NC66485E375EN.html>

To pay by Wire Transfer, please, fill in your contact details in the form below:
