Abstracts

Optical Time-Domain Reflectometer (OTDR) is a fiber optic testing instrument that injects a train of powerful optic pulses into a fiber cable, and subsequently detects the signals reflected due to Rayleigh backscattering and Fresnel reflections.

The report analyzes and presents an overview of Optical Time-Domain Reflectometer (OTDR) market worldwide. The report provides a review of market trends, classification, key terminology, Settings, and limitations for OTDR. The report highlights on various strategic industry activities of major companies witnessed by the industry over the last few years. In addition, 54 companies operating in the Optical Time-Domain Reflectometer (OTDR) arena worldwide including AFL, EXFO Inc., Fluke Corporation, Yokogawa Measurement Technologies Ltd., Trilithic Inc., and others are profiled.
