Abstracts

The global outlook series on Plastics provides a collection of statistical anecdotes, market briefs, and concise summaries of research findings.

The report offers rich quantitative analysis into this most indispensable material of modern life.

The omnipotence of plastics is mirrored in its widespread application in every walk of life, and in every sector of the world's economy i.e.

from packaging consumer goods to manufacturing aeronautical components, and everything in between.

The report provides rich statistical analysis, facts, and figures on the global market.

Amplified with 91 information rich tables, the global market discussion evaluates HDPE, LDPE, Polypropylene, PVC, Purified Terephthalic Acid, Polycarbonate, Synthetic Rubber, and Polyurethane demand by region/country/end-use application, and product type (wherever applicable).

Also provided is a compilation of all recent mergers, acquisitions, and strategic corporate developments.

Regional markets briefly abstracted, and summarized include the US, Canada, Japan, France, Germany, Poland, UK, Australia, China, India, Singapore, South Korea, and Egypt, among few others.

Also included is an indexed, easy-to-refer, fact-finder directory listing the addresses, and contact details of 829 companies worldwide.

Current & Future Analysis

Table 1. World Recent Past, Current and Future Analysis for Plastics by Geographic Region-US, Europe, Asia-Pacific (including Japan) and Rest of World Markets Independently Analysed with Annual Sales Figures in Million Tons for the Years 2010 through 2015

Table 2. World Plastics Market (2011 & 2015): Percentage Breakdown of Volume Sales by Geographic Region - US, Europe, Asia-Pacific (including Japan) and Rest of World

Table 3. Global Plastics Market by Region/Country (2010): Percentage Share Breakdown of Production Volume

Noteworthy Trends

Plastic Packaging to Gain Imperative Status

Engineered Plastics Display Consistent Growth

Consolidation Reshapes the Industry

Automobile and Electronic Fuel Demand for Engineering Plastics

Reinforced Plastics Gain Momentum

2.INDUSTRY DEFINITIONS

Plastics – The Product

Thermoplastics

Thermosets

Hybrid Plastics

Types of Plastic

Polyethylene - A Useful Petrochemical Product

High Density Polyethylene (HDPE)

Low Density Polyethylene (LDPE)

Linear Low Density Polyethylene (LLDPE)
Polyethylene Terephthalate (PET)
Polyvinyl Chloride (PVC/Vinyl)
Polypropylene (PP)
Polystyrene (PS)
Others
Key Applications of Plastics
