## Abstracts

Smart Headlights, a prospecting offer, describes as to how technology is fast permeating the driving arena and why smart headlights are the answer to night time driving.

The report predicts that the development of smart headlights is going to be the game changer in the automobile industry as drivers have never had it easy with automobile manufacturers going all the way and incorporating a plethora of connected devices, to ease the stress on the driver, the only snag being night time driving during snow, rain, or hailstorm. Any driver worth his/her salt would give an arm and a leg to have their hands on any vehicle which will overcome this hurdle.
