Important locations and subsidiaries – A list of key locations and subsidiaries of the company, including contact details.

Highlights

Energy Resources Conservation and Development Commission (California Energy Commission) is the primary agency for energy policy framing and planning in the state of California. It ensures reliable supply of energy while protecting public health, safety and environment. The commission operates through divisions which are responsible for forecasting future statewide electricity needs; licensing new power plants and designating transmission line corridors; promote energy efficiency and conservation; develop renewable energy resources and alternative energy technologies; and plan and direct state response to energy emergencies. California Energy Commission receives funding for operations from electricity consumption surcharge collected by the electric utilities through customer bills; besides federal government funding for specific energy efficiency programs. The commission regulates the energy utilities in the state. California Energy Commission is headquartered in Sacramento, California, the US.

Reasons to Buy
