Abstracts

According to our (Global Info Research) latest study, the global 3-Terminal Capacitors market size was valued at US\$ 1241 million in 2024 and is forecast to a readjusted size of USD 2595 million by 2031 with a CAGR of 11.2% during review period.

3-Terminal Capacitors may be a through-hole with 3 leads or surface mount with 3 pads. 3-Terminal Capacitors are ceramic capacitors in which the shape of the lead terminals is altered to improve the high-frequency characteristics of 2 terminal capacitors. Three terminals allow one terminal to act as a common while the other two are connected to the individual capacitors.

With its unique three-pin structure, the 3-terminal capacitor significantly improves the filtering effect of the capacitor, and is therefore increasingly favored in various electronic applications. This improvement enables it to perform well in high-frequency applications, thereby driving the rapid growth of its market demand.

The application fields of 3-terminal capacitors are very wide, including consumer electronics, automobiles, industry, networks and other fields. Among them, the consumer electronics field occupies the largest market share, with sales accounting for 38.5% of the total market. This is mainly attributed to the strong demand for high-performance capacitors in smartphones, tablets and other electronic devices. It is followed by the network field and the automotive field, which occupy 22.37% and 20.96% of the market share respectively. The rapid development of network equipment and automotive electronics also provides a driving force for the continued growth of the 3-terminal capacitor market. With technological advancement and the emergence of new applications, the demand in these areas is expected to further drive the expansion

of the market.

Although the market is mainly dominated by a few large companies, the market concentration is high, and major global manufacturers include Murata, Kyocera/AVX, TDK, Walsin, Samsung, Fenghua Advanced Technology, Maruwa and Taiyo Yuden. In 2023, the top five global manufacturers accounted for about 60.29% of the market share. This shows that the market leaders are constantly driving the development of the industry in terms of technological innovation and market competition. In the future, as the demand for high-performance three-terminal capacitors in electronic products increases, these key manufacturers will continue to play an important role in the market.
