Abstracts

According to our (Global Info Research) latest study, the global 5G Small Cell Sites market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

According to the standard definition of 3GPP, 5G base stations can be divided into three categories based on power: wide area base stations, medium coverage base stations, and local area base stations. Wide area base stations are commonly referred to as macro base stations, while the latter two are micro base stations, pico base stations, and flying base stations, collectively referred to as small base stations.

In order to minimize the cost pressure of network construction as much as possible, in addition to relying on macro stations, 5G construction requires a wider application of 5G small base stations to fill the gap. 5G small base stations have the characteristics of low quality, low cost, high performance, low power consumption, and easy deployment, and have become an important killer of 5G construction.

5G is a key and cross-age technology that opens the era of the Internet of Everything, and all countries are grabbing market share. The Global Mobile Economy Development Report 2023 released by GSMA Intelligence pointed out that by the end of 2022, the number of global mobile users would exceed 5.4 billion. The mobile ecosystem supports 16 million jobs directly and 12 million jobs indirectly.

China is a leader in 5G technology. According to the latest statistics from the Ministry of Industry and Information Technology, China newly added 887,000 5G base stations in 2022 (currently reaching 2.312 million, accounting for more than 60% of the world's

total), and 110 cities in China have reached gigabit city construction standard. According to the Digital China Development Report (2022) released by the State Internet Information Office, by the end of 2022, China had built a total of 2.312 million 5G base stations, with 561 million 5G users, accounting for more than 60% of the world.
