Absorbable Craniomaxillofacial Plate and Screw (Nail) System is a specialized medical device used in craniofacial and maxillofacial surgery. This system is designed to provide temporary stabilization and support to bones in the skull and facial region, such as during the repair of fractures or reconstruction after trauma or surgery. Unlike traditional metal plates and screws, this system is made from materials that gradually absorb into the body, eliminating the need for a second surgery to remove the hardware.
