Abstracts

According to our (Global Info Research) latest study, the global Active Vibration Isolation Unit market size was valued at US\$ 237 million in 2024 and is forecast to a readjusted size of USD 373 million by 2031 with a CAGR of 6.7% during review period.

Active Vibration Isolation Unit contains a feedback circuit which consists of a sensor (for example a piezoelectric accelerometer or a geophone), a controller, and an actuator. The acceleration (vibration) signal is processed by a control circuit and amplifier. Then it feeds the electromagnetic actuator, which amplifies the signal. As a result of such a feedback system, a considerably stronger suppression of vibrations is achieved compared to ordinary damping.

Global key players of Active Vibration Isolation Unit include Kurashiki Kako, Ametek (TMC), Tokkyokiki Corporation, Showa Science, The Table Stable, etc. The top five players hold a share about 60%. Asia is the largest market, and has a share about 35%, followed by Europe and North America with share 30% and 29%, separately. In terms of product type, Springs Leveling System is the largest segment, occupied for a share of 58%. In terms of application, Semiconductor Industry has a share about 40 percent.
