According to our (Global Info Research) latest study, the global Adhesive For Automotive Welding market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

The electric welding sealant is pre-applied on the overlapping parts of the steel plate welding, and the gap is filled after spot welding to ensure sealing and prevent rust. Spot weld sealant is even more indispensable for those parts that are masked after assembly and difficult to apply weld sealant. This type of adhesive mainly includes resin-based sealants based on PVC weld sealants and rubber-based electric welding sealants based on styrene-butadiene and butyl rubber. PVC seam sealant is a heating hard paste coating made of polyvinyl chloride as the main component, mixed with fillers, plasticizers, additives, etc., with excellent sealing, water resistance, shock resistance and beautiful appearance. The product is non-corrosive to the body and can be matched with various primers.

Automotive is a key driver of this industry. According to data from the World Automobile Organization (OICA), global automobile production and sales in 2017 reached their peak in the past 10 years, at 97.3 million and 95.89 million respectively. In 2018, the global economic expansion ended, and the global auto market declined as a whole. In 2022, there will wear units 81.6 million vehicles in the world. At present, more than 90% of the world's automobiles are concentrated in the three continents of Asia, Europe and North America, of which Asia automobile production accounts for 56% of the world, Europe accounts for 20%, and North America accounts for 16%. The world major automobile producing countries include China, the United States, Japan, South Korea, Germany, India, Mexico, and other countries; among them, China is the largest

automobile producing country in the world, accounting for about 32%. Japan is the world's largest car exporter, exporting more than 3.5 million vehicles in 2022.
