According to our (Global Info Research) latest study, the global Aircraft Control Components market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

In 2021, the global large commercial aircraft market performed well overall, with both total deliveries and orders rising sharply. Overall, aircraft deliveries increased by 32% to 951 aircraft, 228 more than the previous year. Deliveries of single-aisle aircraft increased for the first time in two years, up about 51% year-on-year, but deliveries of wide-body aircraft fell another 20% from the low level in 2020, setting a record low. The continued decline in global wide-body aircraft deliveries can be attributed to a weak recovery in international travel due to the ongoing pandemic.
