According to our (Global Info Research) latest study, the global Aluminum Trusses market size was valued at US\$ 947 million in 2023 and is forecast to a readjusted size of USD 1149 million by 2030 with a CAGR of 2.8% during review period.

A truss is a structure that consists of two-force members only, where the members are organised so that it behaves as a single object. The primary materials most commonly used for stage lighting trusses are Aluminum and Steel. Aluminum, because of its durability, light weight and ease of transport, is the optimum choice for use in concert or stage production.

The aluminum truss industry is experiencing rapid growth, driven by several market factors. Firstly, the increase in large-scale events and exhibitions has significantly boosted the demand for lightweight, detachable support structures. Aluminum trusses are preferred for their ease of transport and assembly, making them the go-to material for event planning and stage production. Secondly, advancements in technology have improved the design and manufacturing processes of aluminum trusses, enhancing their load-bearing capacity and durability to meet stringent safety standards.

Moreover, the rising emphasis on environmental sustainability is propelling market demand for aluminum trusses. Aluminum is recyclable and aligns with sustainable development goals, appealing to an increasing number of businesses. At the same time, the construction and events industries are seeking more aesthetic and flexible solutions, prompting diverse designs in aluminum trusses to accommodate various settings and requirements.

Regionally, the Asia-Pacific market, particularly in countries like China and India, is becoming a significant driver of growth due to rapid urbanization and a surge in large events. Overall, the aluminum truss industry is trending towards lightweight, modular,

and eco-friendly solutions, indicating a promising market outlook.

Global Aluminum Trusses key players include Global Truss, Eurotruss, James Thomas Engineering, Prolyte Group, Milos, etc. Global top five manufacturers hold a share about 20%.
