According to our (Global Info Research) latest study, the global Anilox Roll Cleaning Machines market size was valued at US\$ 81.5 million in 2024 and is forecast to a readjusted size of USD 104 million by 2031 with a CAGR of 3.5% during review period.

Anilox Roll Cleaning Machines are specialized devices used to clean and maintain anilox rolls, which are critical components in flexographic and other printing processes. Anilox rolls feature a surface covered with tiny, engraved cells that carry a precise volume of ink to the printing plate. Over time, these cells can become clogged with dried ink, coatings, or other contaminants, leading to reduced print quality and inefficiencies. Cleaning machines ensure the rolls remain in optimal condition by effectively removing these residues without damaging the delicate engraved surface.
