Anti-static overalls for pharmaceutical manufacturing are special work clothes designed for the pharmaceutical manufacturing industry to prevent the generation and accumulation of static electricity, so as to protect sensitive electronic equipment and medicines in the production process from interference and damage caused by electrostatic discharge (ESD). Anti-static overalls for pharmaceutical manufacturing are one-piece work clothes made of special anti-static clean fabrics. This fabric usually uses special polyester filaments, with conductive fibers woven in the warp or weft direction, and has high-efficiency and long-lasting anti-static and dust-proof properties. It can effectively release the static charge of the human body and prevent electrostatic discharge from damaging production equipment, electronic components and medicines.
