According to our (Global Info Research) latest study, the global Articular Goniometer market size was valued at US\$ 8.37 million in 2025 and is forecast to a readjusted size of US\$ 11.3 million by 2032 with a CAGR of 4.4% during review period.

An articular goniometer is a specialized medical device used to measure the range of motion (ROM) in joints. It is essential in various medical fields, including orthopedics, physical therapy, sports medicine, and rehabilitation. The term 'articular' refers to the joints (articulations) in the body, highlighting the goniometer's primary function in assessing joint angles.

Global key players of Articular Goniometer include Fabrication Enterprises, Inc (FEI), SAEHAN Corporation, Jtech Medical, Meloq, GemRed, etc. The top five players hold a share about 56%. North America is the largest market, and has a share about 39%, followed by Europe and Asia-Pacific with share 36% and 18%, separately. In terms of product type, Digital Type is the largest segment, accounting for a share of 65%. In terms of application, Hospital and Clinic is the largest field with a share about 48 percent.

Sedentary lifestyles, obesity, and increased participation in sports are contributing to a higher incidence of joint disorders and injuries. This trend is fueling the need for precise assessment tools to diagnose, treat, and monitor recovery from conditions such as ligament tears, fractures, and joint replacements.

The expansion of physical therapy and rehabilitation services worldwide is bolstering the demand for goniometers. As more facilities open and more professionals enter the

field, the need for reliable measurement tools to assess patient progress and tailor treatment plans becomes critical.

With the global population aging, conditions such as osteoarthritis, rheumatoid arthritis, and general joint degeneration are becoming more prevalent. This demographic shift is driving the demand for diagnostic and monitoring tools like goniometers to manage and treat joint-related issues effectively.
