Abstracts

'Copper is a light metal with outstanding malleable and ductile properties. It possesses high thermal and electrical conductivity. It is widely used in numerous industrial and antibacterial applications high malleability property of copper and ease of application in machineries during fabrication procedures enables high production rate of precise copper strips at relatively lower cost as compared to its substitutes.

The copper most commonly used for strip applications complies with ASTM B370. It consists of 99.9 percent copper, and is available in six tempers designated by ASTM B370 as: 060 (soft), H00 (cold rolled), H01 (cold rolled, high yield), H02 (half hard), H03 (three quarter hard), and H04 (hard). Thin copper strips perfect for using with mosaics and many other crafts, and various other applications including electrical and DIY projects.'
