Abstracts

A dithiocarbamate is a functional group in organic chemistry. It is the analog of a carbamate in which both oxygen atoms are replaced by sulfur atoms. Dithiocarbamates specifically ethylene bisdithiocarbamates (EBDCs), in the form of complexes with manganese (maneb), zinc (zineb) or a combination of manganese and zinc (mancozeb), have been used extensively as fungicides in agriculture from the 1940s. Ethylenebisdithiocarbamates (EBDCs) are a group of non-systemic (surface acting) fungicides. EBDCs active ingredients approved for use are mancozeb, maneb, zineb and others. The most EBDC usage involves mancozeb.
