## **Abstracts**

Industrial agitators are machines that are used to blend, mix, or combine different elements in commercial settings. They are frequently found in food factories, in chemical and pharmaceutical labs, and in product manufacturing facilities. Most Industrial agitators bear little resemblance to regular home mixers. Industrial models are typically quite large and often look more like giant boxes or complex machines than anything else. Most of industrial mixing tasks are performed in closed containers with limited air supply and controlled temperatures.
