Abstracts

Scrubber dryer is a device used to clean the floor. The basic scrubber dryer was introduced in the 1920s. The modern scrubber dryer, which is also referring automatic scrubber dryer, was not invented until the middle of the 20th century. It uses a system that generally involves spraying the floor with a combination of cleaning chemicals and water, scrubbing the floor to break up spill, residue and dirt, and then a squeegee-vacuum combination that absorbs the used water, leaving the floor completely dry and clean. Now, scrubber dryers are widely used in these public places like supermarkets and modern malls.
