According to our (Global Info Research) latest study, the global Automated Food Sorting Machines market size was valued at US\$ 1659 million in 2024 and is forecast to a readjusted size of USD 2121 million by 2031 with a CAGR of 3.6% during review period.

Automated Food Sorting Machines are a very import machine used in food processing industry.

They usually sorts foods by colour, size, weight and other properties.

Automated Food Sorting Machines market has several key players, like Tomra, Buhler, Meyer, and Satake, they take a market share of around 48.66% in Revenue. The market is driven by more stringent food safety and quality requirements, such as berries, fruits and nuts. Demand is also driven by demographics and the health of the economy. The profitability of individual companies depends on their ability to bid accurately, secure contracts, and control costs. Large companies enjoy economies of scale in financing and the ability to offer a broad range of services in many locations. Smaller companies can compete effectively by specializing in particular services or focusing on certain geography.

On the basis of region, Asia-Pacific is the largest consumption market segment of Automated Food Sorting Machines, with a market share nearly 56% in 2019, followed by Europe with 19% in 2019. China is still in the stage of market development, far from maturity, especially like wheat and corn. The products of the two developed countries are relatively mature, the renewal is relatively slow, and the contribution to the market is not as big as China. China's labor costs are also a big advantage.
