According to our (Global Info Research) latest study, the global Banaba Corosolic Acid Extract market size was valued at US\$ 8.7 million in 2024 and is forecast to a readjusted size of USD 13.1 million by 2031 with a CAGR of 6.0% during review period.

Corosolic Acid is a naturally occurring pentacyclic triterpenoid compound found primarily in the leaves of the *Lagerstroemia speciosa* plant, commonly known as the banaba tree. It is also present in smaller amounts in other plants such as apple peels, basil, and rosemary. Corosolic acid has garnered significant attention due to its potential therapeutic properties, particularly its role in managing blood sugar levels, promoting weight loss, and acting as an antioxidant.

The global market for corosolic acid is experiencing steady growth due to increasing consumer awareness of natural health supplements and the rising prevalence of lifestyle-related diseases such as diabetes and obesity.

With increasing diabetes cases worldwide, the corosolic acid market is set to expand rapidly, especially in countries such as India, which is known as the world capital of diabetes. The beneficial qualities of this acid are known to treat severe diseases, including cancer and kidney failure. The demand for the chemical is the most in the pharma and healthcare industry, as patients grapple with diabetes with each passing day. Primarily, corosolic acid is used to treat type-2 diabetes, as it decreases insulin resistance in patients. As the pandemic has receded, it has left behind many post-recovery side effects in COVID patients, diabetes being one of the most prominent diseases. Corosolic acid inhibits the proliferation of those cells by increasing glucose uptake in the body. Furthermore, it can also reduce the incidence of tumors in patients. This is deemed highly beneficial for diabetes and those with liver cancer, which is caused by diabetes. This development will increase market growth due to the immense

benefits of the acid in the pharma and medical industry.

The main development trends in the future include:

Increased Use in Functional Foods: Integration of corosolic acid into beverages and snacks targeting metabolic health.

Focus on Sustainable Sourcing: Development of efficient and eco-friendly extraction techniques to ensure consistent supply.

Clinical Research: Greater investment in human trials to substantiate therapeutic claims and expand its application scope.

Customized Products: Development of tailored supplements targeting specific health conditions or demographics.

Global key corosolic acid players include Sanat Products, Vidya Herbs and Staherb Natural Ingredients etc. The top 3 companies hold a share about 44%. North America is the largest market with a share about 44%, followed by Europe and Asia-Pacific. In terms of product, 1% and 2% product is the largest segment with a share about 92%. And in terms of applications, the largest application is pharma and healthcare with a share about 93%.
