Benzisothiazolinone (BIT) is a broad-spectrum isothiazolinone biocide/preservative market centered on supplying BIT formulations and active ingredients—made upstream from chemical feedstocks such as aromatic intermediates/benzene-derived precursors, sulfur- and nitrogen-containing reagents, and industrial solvents via fine-chemical synthesis—to downstream users in water-based paints/coatings, polymer emulsions/adhesives, construction chemicals, household and industrial cleaners/detergents, pulp & paper, textiles/leather, metalworking fluids, and other waterborne systems where microbial control is needed.

In 2025, global Benzisothiazolinone production reached approximately 11687 MT, with an average global market price of around US\$ 2436 per MT. The global single-line production capacity ranges from 2000 to 2500 MT per year. The industry's gross profit margin is approximately 20%-25%.
