Bio-based hemostatic powder is a hemostatic product made from natural biomaterials, designed to quickly control bleeding and promote wound healing. It is usually made of biomaterials such as plant extracts, chitosan, collagen, etc., and has good biocompatibility and degradability. Its working mechanism is to quickly stop bleeding by adsorbing blood, promoting platelet aggregation and accelerating blood clot formation. Bio-based hemostatic powder is widely used in trauma emergency treatment, surgery and other medical scenarios because its natural ingredients are friendly to the human body and can effectively reduce the risk of infection and complications.
