According to our (Global Info Research) latest study, the global Biocompatible PEEK market size was valued at US\$ 504 million in 2024 and is forecast to a readjusted size of USD 841 million by 2031 with a CAGR of 7.6% during review period.

Biocompatible PEEK refers to a polyetheretherketone material that has been rigorously tested and certified. It has a stable chemical structure, which can ensure that it is non-cytotoxic, mutagenic and carcinogenic when in contact with human tissue. At the same time, it will not cause allergic reactions in the human immune system. It has a high degree of biological inertness and can exist stably in the internal environment of the human body for a long time without adverse reactions with body fluids or tissues. It is an ideal polymer material suitable for the manufacture of medical devices or medical consumables.
