According to our latest research, the global Biotechnology Contract Manufacturing market size will reach USD 32390 million in 2031, growing at a CAGR of 8.6% over the analysis period.

The increasing popularity of biologics in medicine has led to a significant rise in outsourcing manufacturing. Biologics contract manufacturers have the know-how and setup to make these complex therapies effective while ensuring the meeting of strict quality rules and regulations.

According to Statista, there were more than 21,000 drugs in the global R&D pipeline in 2023. Also, the FDA approved 71 new drugs in 2023; out of these, 48% of new approvals were biologics. Moreover, the demand for biologic drug substance contract manufacturing is expected to be the highest among smaller biotech companies that hold intellectual property rights for novel biologics. This has led to the incorporation of cutting-edge production methods like continuous manufacturing and single-use technologies aimed at enhancing operational efficiency and adaptability. Additionally, partnerships and collaborations between pharmaceutical firms and contract manufacturing organizations are increasing for biologic drug product manufacturing, allowing for the modification of manufacturing processes and cost-effective solutions.
