According to our (Global Info Research) latest study, the global Camping Air Bed market size was valued at US\$ 555 million in 2024 and is forecast to a readjusted size of USD 802 million by 2031 with a CAGR of 5.5% during review period.

In an air mattress, apart from the fabric (some use insulation), the only thing that supports the internal structure and bears the weight is the air. There are thick and thin ones. If the air mattress is larger, it can be equipped with an electric inflator to facilitate inflating and deflating. Advantages: Relatively comfortable, light weight, small footprint, easy to carry. Disadvantages: When the temperature is low, ordinary air mattresses are generally insulated. If two people share an air bed, it is easy to interfere with each other.

In 2022, the epidemic prevention and control measures around the world will be gradually relaxed, which will have a positive impact on the rapid recovery of the tourism industry. According to the data of the World Tourism Organization, the number of global travelers will exceed 900 million in 2022, a double increase compared to 2021. The international tourism industry will recover to 63% in 2019. In 2022, international tourism revenue will return to the US\$1 trillion mark, a real increase of 50% compared with 2021. According to data from the Ministry of Culture and Tourism of China, in 2022, the total number of domestic tourists will be 2.53 billion. Domestic tourism revenue (total tourism consumption) is about 2 trillion yuan. The total passenger transport volume for the year was 5.6 billion person-times.
