Abstracts

According to our (Global Info Research) latest study, the global Camping Self-inflating Mattress market size was valued at US\$ 555 million in 2024 and is forecast to a readjusted size of USD 802 million by 2031 with a CAGR of 5.5% during review period.

The biggest difference between the self-inflating mattress is that in addition to air, there is also a thermal insulation foam filling material, which plays a role in comfort and warmth. Body heat is less likely to dissipate from the floor through the mattress at night. Advantages: Warm and supportive. Inflating is simple, just open the inflation valve, flatten the mattress, and the air will fill itself through the inhalation valve. Disadvantages: bulky, relatively heavy weight.

In 2022, the epidemic prevention and control measures around the world will be gradually relaxed, which will have a positive impact on the rapid recovery of the tourism industry. According to the data of the World Tourism Organization, the number of global travelers will exceed 900 million in 2022, a double increase compared to 2021. The international tourism industry will recover to 63% in 2019. In 2022, international tourism revenue will return to the US\$1 trillion mark, a real increase of 50% compared with 2021. According to data from the Ministry of Culture and Tourism of China, in 2022, the total number of domestic tourists will be 2.53 billion. Domestic tourism revenue (total tourism consumption) is about 2 trillion yuan. The total passenger transport volume for the year was 5.6 billion person-times.
