Abstracts

According to our latest research, the global Captive Shared Services market size will reach USD million in 2031, growing at a CAGR of %over the analysis period.

Shared service is the provision of a service by one part of an organization or group, where that service had previously been found, in more than one part of the organization or group. Thus the funding and resourcing of the service is shared and the providing department effectively becomes an internal service provider. The key here is the idea of 'sharing' within an organization or group. This sharing needs to fundamentally include shared accountability of results by the unit from where the work is migrated to the provider. The provider, on the other hand, needs to ensure that the agreed results are delivered based on defined measures (KPIs, cost, quality etc). Captive centers are client-owned-and-operated service delivery centers, typically in a nondomestic, low-cost location, that provide service resources directly to their organization. The personnel in a captive facility are legal employees of the organization, not the vendor.
