Carbon steel butterfly valve is a butterfly valve made of carbon steel material, which controls the flow of fluid medium through the rotation of the butterfly plate. Carbon steel butterfly valves are suitable for various media, including but not limited to water, oil, gas, and steam. In water treatment systems, carbon steel butterfly valves can effectively control water flow and have good corrosion resistance; In the petroleum industry, carbon steel butterfly valves can be used to control the flow of oil products, such as crude oil, refined oil, etc; Carbon steel butterfly valves also play a key role in the transportation of gas media such as natural gas, air, coal gas, etc; In the thermal system, carbon steel butterfly valves can withstand high temperature and high pressure steam environments, ensuring the stable operation of the system.
