## Abstracts

Alfalfa hay is an excellent source of good quality protein and fiber. Alfalfa is a legume hay and is sometimes called “lucerne”. These hays are higher in protein and minerals and are more palatable than grass hays. Alfalfa in particular is high in energy and is an excellent source of vitamins and minerals. When properly cured, alfalfa is the best of the legume hays from a nutrient standpoint. It has the most feed value of all the perennial pasture forages. Alfalfa is used as for horses, dairy cows, beef cattle, sheep, chickens, turkeys and other farm animals.

Scope of the Report:

This report focuses on the Alfalfa Hay in China market, to split the market based on manufacturers, Regions (Province), type and application.

Market Segment by Manufacturers, this report covers
