## Abstracts

A pool cleaner is a vacuum cleaner intended to collect debris and sediment from swimming pools with minimal human intervention. It is one of several types of swimming pool vacuum cleaners. Other major types are battery-powered or manually powered wands effective only for very small pools, kiddie or wading pools and small spas and hot tubs, and battery-powered, handheld/extended reach pool and spa vacuums. The latter are powered by rechargeable batteries and can be hand held attached to a telescopic pole used for extended reach. These are used for small to medium-sized pools, larger spas, and to spot clean larger pools. The name "creepy-crawly" derives from the vacuum's webbed-nozzle crawling creepily through the underwater mist as well as for its creepy suction noise. "Creepy crawly" originally referred to strange creatures that crawl on the bottom of the ocean, as the webbed nozzle of the vacuum slightly resembles an octopus in both appearance and suction ability. There are 3 types of automatic pool cleaners you can choose from: suction-side, pressure-side, and robotic.

Scope of the Report:

This report focuses on the Pool Cleaners in China market, to split the market based on manufacturers, Regions (Province), type and application.

Market Segment by Manufacturers, this report covers

Zodiac

Maytronics

Pentair

Hayward

Fluidra
