A civil airplane tire, also known as an aircraft tire or aviation tire, is a specialized tire designed for use on commercial and civil aircraft. These tires are essential components of an aircraft's landing gear system, providing support, cushioning, and braking capabilities during takeoff, landing, and taxiing operations. Civil airplane tires are engineered to withstand high loads, rapid acceleration, and extreme landing forces while ensuring the safety and performance of the aircraft.

In 2022, global tire sales reached 1.749 billion units, of which the three major markets of Europe, North America and China will collectively sell 1.14 billion units, accounting for 65% of the total. China is the world's largest tire producer and exporter. Among the top 75 tire companies in 2022 released by Tire Business, 34 are Chinese companies (including 5 from Taiwan), with a total sale of approximately US\$ 34.5 billion, accounting for approximately 19.42% of the total global sales. According to data from the National Bureau of Statistics, by the end of December 2022, the output of rubber tire casings in China was about 856 million. According to the data of the General Administration of Customs, in 2022, the cumulative export volume of rubber tires in China was 7.65 million tons, a year-on-year increase of 4.7%; the export value was ?131.418 billion, an increase of 16%; the trade surplus was 103.709 billion yuan, an increase of ?15.89 billion.
