According to our (Global Info Research) latest study, the global Constant Temperature Electric Blanket market size was valued at US\$ 860 million in 2024 and is forecast to a readjusted size of USD 1243 million by 2031 with a CAGR of 5.5% during review period.

A constant temperature electric blanket refers to an electric blanket that can maintain a constant temperature during use.

Electric blankets consume less power, have adjustable temperature, are easy to use, and are widely used. They have a history of more than 100 years. Compared with heating equipment such as air conditioners and small suns, electric blankets are economical and have been popular with consumers for a long time, and their sales have risen sharply. However, with the growth of residents' income and the improvement of safety awareness, the total supply of the electric blanket industry tends to be saturated after the initial rapid expansion.
