Folding 2A film usually refers to an optical film with specific functions applied to folding screen devices (such as folding screen mobile phones, folding screen tablets, etc.). The '2A' here is not a strict naming or classification standard, but according to the relevant product descriptions on the market, it can be understood as an optical film with functions such as anti-reflective (AR) and anti-glare (AG). Sometimes, it may also include anti-fingerprint (AF) function, although in this case it may be more comprehensively referred to as '3A' film. However, in the specific application of folding screen devices, 2A film or optical film with similar functions mainly focuses on improving visual experience and screen protection.
