## Abstracts

According to our (Global Info Research) latest study, the global Corrugated Box Printing Equipment market size was valued at US\$ 468 million in 2025 and is forecast to a readjusted size of US\$ 726 million by 2032 with a CAGR of 6.3% during review period.

Corrugated carton printing equipment refers to specialized machinery used to print graphics, logos, barcodes, and other visual elements on corrugated boards. It includes flexographic printers, combined slotting-printing machines, and high-speed digital printers. By employing accurate printing plates or digital inkjet technology, these systems can be integrated with corrugators or operated independently to meet customized packaging requirements, enhancing both visual appeal and informational clarity of corrugated cartons. In 2025, global Corrugated Box Printer sales reached approximately 6,500 Units, with an average price of 70 K US\$/Unit. and gross margin is around 30%-40%.

The corrugated carton printing equipment industry chain begins upstream with key materials and components such as steel structures, drive systems, printing cylinders, inkjet modules, and control systems; the midstream focuses on equipment manufacturing and system integration for flexographic and digital printing machines; downstream users are corrugated board plants, carton manufacturers, and packaging printers serving e-commerce, logistics, and branded packaging markets.
