Abstracts

According to our (Global Info Research) latest study, the global CPAP Mask market size was valued at US\$ 2638 million in 2024 and is forecast to a readjusted size of USD 3789 million by 2031 with a CAGR of 5.4% during review period.

Continuous positive airway pressure (CPAP) is a form of positive airway pressure ventilator, which applies mild air pressure on a continuous basis to keep the airways continuously open in people who are able to breathe spontaneously on their own. It is an alternative to positive end-expiratory pressure (PEEP). Both modalities stent the lungs' alveoli open and thus recruit more of the lung's surface area for ventilation. But while PEEP refers to devices that impose positive pressure only at the end of the exhalation, CPAP devices apply continuous positive airway pressure throughout the breathing cycle. Thus, the ventilator itself does not cycle during CPAP, no additional pressure above the level of CPAP is provided, and patients must initiate all of their breaths. CPAP Masks are masks used in CPAP.

Global CAPA mask key players include ResMed, Philips, Fisher & Paykel, Air Liquide, Medical Systems, Dr?ger, Vyaire Medical, etc. Global top six manufacturers hold a share about 80%.
