According to our (Global Info Research) latest study, the global Dental Implants and Prosthesis market size was valued at US\$ 6224 million in 2024 and is forecast to a readjusted size of USD 9458 million by 2031 with a CAGR of 6.2% during review period.

Dental implants and prostheses are artificial devices used to replace missing teeth or parts of the oral structure. A dental implant is a titanium post surgically inserted into the jawbone, acting as a replacement for a natural tooth root, providing a strong foundation for fixed or removable replacement teeth. Prostheses, on the other hand, include various types of dental replacements such as crowns, bridges, dentures, or full mouth reconstructions that restore function and aesthetics. Together, dental implants and prostheses offer a durable, functional, and natural-looking solution for tooth loss or damage.

The dental implants and prostheses market is driven by several key factors, as well as facing certain challenges:

Market Drivers:

Aging Population: With an increasing global elderly population, there is a growing prevalence of tooth loss and oral health issues, driving demand for dental implants and prostheses.

Rising Awareness of Oral Health: Greater public awareness of dental care, aesthetics, and the long-term benefits of dental implants has boosted market growth.

Advancements in Technology: Innovations in dental implant materials, digital dentistry (such as 3D printing and CAD/CAM), and minimally invasive procedures have made implants more accessible and reliable.

Increasing Disposable Income: In emerging markets, growing middle-class populations with higher disposable incomes have fueled demand for advanced dental treatments like implants and prostheses.

Market Challenges:

High Cost of Procedures: Dental implant surgeries and prostheses can be expensive, limiting access for many patients, particularly in low-income regions.

Complexity of Procedures: Implant placement requires specialized skills, infrastructure, and postoperative care, which may not be available in all areas.

Regulatory Hurdles: The strict regulations surrounding dental devices can slow down the approval and distribution of new products, delaying market growth.

Risk of Complications: Despite technological advances, there is still a risk of complications such as implant failure, infections, and longer recovery times, which can deter patients from opting for implants.

Europe is the largest consumption market of Dental Implant, with market share nearly 44.5% in 2023. The second place is North America; following Europe with the market share over 21.5%, China, Korea and Japan are also an important sales area.

The major global manufacturers include Straumann, Envista, Dentsply, ZimVie, Osstem, Henry Schein, Dentium, GC, and DIO, etc. In 2023, the world's top five vendors accounted for approximately 73% of the revenue.
