Abstracts

According to our (Global Info Research) latest study, the global Desktop Bladeless Fan market size was valued at US\$ 725 million in 2024 and is forecast to a readjusted size of USD 953 million by 2031 with a CAGR of 4.0% during review period.

A bladeless fan, also called an air multiplier, can generate a natural and continuous cool air, and because there are no blades, it will not cover dust or hurt children's fingers. What's even more amazing is its peculiar shape, and its appearance is both streamlined and refreshing. Inspired by Air Vane Hand Dryers. The hand dryer works by forcing air through a small opening to 'brush' the water on the hands, and the air multiplier blows air out of a 1.3mm wide cut that rotates around a ring. Because the air is forced out of this circle, the amount of air passing through can be increased by a factor of 15, and the speed can be increased to a maximum of 35 kilometers per hour.

Today's electric fans have changed the traditional image in people's impressions, and they are more personalized in appearance and function. Functions and other functions that belong to air conditioners have also been used by many electric fan manufacturers to make a fuss, and on this basis, more practical functions such as lighting and mosquito repellent have been added. These products with eclectic appearance and diverse functions have become a highlight in the electric fan market this year, and this differentiated selling point also indicates the future development trend and direction of the entire electric fan industry. As a small household appliance, electric fans have a very long history of use. Until now, electric fans have entered thousands of households due to their cheapness and energy-saving features, and have become the main means for every family to control indoor air circulation and cool down. Judging from past data, the demand for electric fans has not decreased with the increase in the share of air

conditioners. In the long run, the electric fan market will usher in new development. How to tap new user needs while improving functionality? Demand is a topic that electric fan brands need to discuss at present.
